

# PROPELLANT FOR SPRAY EXTENDER

KEEP OUT OF REACH OF CHILDREN

## HOW TO ATTACH AIR BRUSH TO AIR SUPPLY

1. Turn regulator valve to PROPEL can by turning clockwise. When gas begins to escape while attaching regulator, turn valve stem counter clockwise.

2. Attach air hose to regulator turning clockwise.

3. Attach air brush to air hose by turning clockwise.

4. Turn open regulator valve until hose is attached to PROPEL can and air brush.

5. Turn on regulator valve clockwise until desired pressure is released.

6. Turn off regulator when not painting. This will stop air supply.

7. When not spraying, excess pressure builds up.

8. EXCESS PRESSURE IS RELEASED IN THE FIRST SECOND OF SPRAYING OPERATION.
